DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to bus controller specifics, classified in class 710, subclass 305.
- II. Claims 14-28, drawn to memory controller specifics, classified in class 711, subclass 154.
- III. Claims 29-33, drawn to clock rate specifics, classified in class 713, subclass 500.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as in a system lacking the memory controller specifics and clock rate specifics, particulars. Invention II has separate utility such as in a system lacking the clock rate specifics, particulars. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III and Group II is not required for Group III, restriction for examination purposes as indicated is proper.

Art Unit: 2186

A telephone call was made to Michael Proksch on 5/20/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
